Warranty INFORMATION GUIDE

300-304 Northbourne Ave Dickson
BLOC Constructions (ACT) Pty Ltd

PRODUCT WARRANTY & SUPPLIER INFORMATION

Dear Valued Client,

The Harvey Norman Commercial Warranty Guide is a designed to help you identify the products that were proudly supplied to the project that includes or is your new home.

The domestic warranty and domestic warranty labour details noted on the INCLUSION LIST, that follows, are a GUIDE ONLY.
The details are correct at the time of publication but are subject to change. The advice can be affected by changes by suppliers, new distribution companies, human error, product substitution on supply etc. Product models can be changed as well by the developer/builder without our knowledge, this is normally due to supply and availability
Our Warranty Service team will verify warranty details with the supplier's service teams and confirm with you at the time of any warranty service request.

The next page in this pack is the **INCLUSION LIST** that describes products supplied to this development by Harvey Norman Commercial. The **INCLUSION LIST** notes the domestic warranty period for each product and shows any labour period (plumber, electrician, technician) if applicable.

To contact our Customer Service Team for a warranty repair:

1. Scan our Customer Service QR code

OR

2. Email: NewServiceJobsHNC@au.harveynorman.com

3. Call us on 1300 562 695

NB: If you have purchased a new unit your Warranty generally commences from the date of Settlement of the Conveyance - TBC at time of product warranty claim.

• Special finishes generally have 1 Year Warranty replacement. Example: Matt Black - Please refer to inclusion list

Supplier INFORMATION

Billi™

Originating in Australia, Billi has been at the forefront of the instant filtered boiling and chilled water systems industry for over 30 years. Billi products are celebrated for their combination of functionality, performance, and contemporary aesthetics. Proudly Australian-made and designed, Billi products have brought a unique concept of under bench instant filtered boiling, chilled, and sparkling drinking water to many countries around the globe.

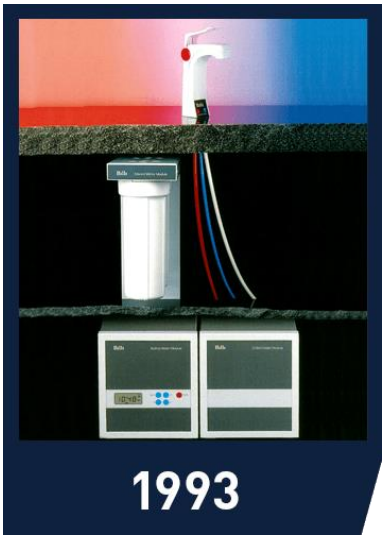

Manufactured in Melbourne, Australia to strict quality standards, Billi water systems come with an assurance of quality, innovation, and sustainability. Incorporating cutting edge eco-technology features and modern designs, Billi delivers solutions that keep pace with the ever-changing needs of its users.

Synonymous with innovation, Billi prides itself on being the leading designer and manufacturer of boiling, chilled, sparkling and still filtered water systems.

With all Boiling & Chilled units manufactured in Melbourne, Australia, they are uncompromising on quality and dedicated to delivering the most reliable, high performance and stylish products on the market.

The Billi range of products includes industry leading features such as water-cooled technology, space-saving under bench footprints, specialty dispensers, plus a large range of models that do not require cupboard ventilation cut outs or grilles. This makes their units easy to install, energy efficient and user-friendly for all.

Supplier INFORMATION

CAROMA

Caroma (Caroma Dorf) is an Australian designer and distributor of bathroom products. Caroma was established in 1941 by Hungarian-born Charles Rothauser, and since closing its last factory in 2017 now sources all products from third-party overseas manufacturers. Caroma is a subsidiary of GWA International Limited, and introduced the world's first two-button dual flush toilet system. The company self-distributes within Australia and abroad sells through distributors such as Sustainable Solutions International in North America and Sanlamere in the United Kingdom.

The company was established in 1941 with a factory at Norwood, an inner eastern suburb of Adelaide. The company announced its intention to close manufacturing in Australia on 8 October 2014. The factory at Wetherill Park in Sydney closed in 2014. It finally closed the Norwood factory on 24 February 2017. Manufacture now occurs in Malaysia, China, and Europe.

With over 80 years of experience, they believe quality bathrooms are a balance of form, function and looks. Their designs and innovation bring to life a guiding vision of creating sustainable luxury. Design that enables you to enjoy bathroom experiences that both complement and elevate your lifestyle, from an energising morning start to an indulgent, relaxing moment of luxury, all underpinned by sustainability.

Designing for Australians and New Zealanders, from all walks of life, with different tastes and needs; they have a wide range of classic to artisanal styles, smart designs and sustainable innovations providing you with everything you need to create the sanctuary of your dreams.

Supplier INFORMATION

Fisher&Paykel

Fisher & Paykel has been designing products since 1934 and has grown into a global company with products sold in more than 50 countries around the world. Fisher & Paykel design heritage is founded on a pioneering spirit and a culture of curiosity. They've built their legacy with a future focus that still stays true to the fundamentals of sustainable design. They believe technology should always begin with the people who use it. This has seen us challenge conventional appliance design to create products that deliver to genuine human need. Fisher Paykel ongoing research and development is backed by a culture of open innovation, collaboration, and curiosity – one that seeks to uncover insights and ideas that connect with their customers and respect their planet.

The idea of the Social Kitchen underpins fishers design philosophy in developing flexible appliances that can be distributed throughout your kitchen and tailored to your individual lifestyle and needs. It is both a concept and a lived experience that connects people with food and design. The Social Kitchen draws on a deep understanding of patterns of use. The kitchen is no longer just a place where food is made. It is where they meet to talk about their day, where homework is done, where they engage and interact as families and friends. Considered kitchens respect and reflect these patterns of use in their layout and in appliances that provide flexibility. That flexibility allows us to shift between the different requirements they have of their kitchens. By understanding the way kitchens are used they know what their customers are looking for in their perfect kitchen. They are looking for choices, for the freedom to create unencumbered by the restrictions of their appliance. The best innovators don't just understand technology, they understand people. Since 1934, they've been designing technology that enriches and improves people's lives. By challenging conventional appliance design these world-first technologies have changed the way we live forever. In 2014 they celebrated 80 years of this spirit of curiosity.

Supplier INFORMATION

Millennium Advanced Water Solutions

Millennium Tapware is the tapware and bathroom products division of Peter W. Eldering Pty. Ltd. Peter W. Eldering Pty Ltd is an AUSTRALIAN family owned and operated business which has been supplying the plumbing and hardware industry in Australia for over 75 years. For most of that time they were best known as 'Manufacturers Agents', supplying products across a broad range of the hardware industry. Door Furniture, Cabinet Hardware, plumbing fittings, sanitary ware & associated bathroom products were amongst their very successful agencies. The 'Millennium' brand began in 1997 and since then they have concentrated on sourcing, supplying, and marketing their own range of plumber's fittings, mixers & tapware, bathroom accessories and associated products.
Together with their network of branches and agents they have built an enviable reputation for their quality products at an affordable price, service and after sales support.
At Millennium they provide their customers with the highest standard of satisfaction. All Millennium products are manufactured to comply with the relevant Australian Standard and are registered under the WELS (Water Efficiency Labelling Scheme) where applicable.
With their continuing market research and emphasis on functionality & style they can offer a wide range of products to suit the ever changing residential, medium density, commercial and refurbishment markets. Their vast range of products continues to grow to accommodate the increasing & continuous demand for new styles and technology in kitchen and bathroom products.

Supplier INFORMATION

paco jaansōn

Since its conception, Paco Jaanson has been synonymous with the latest world trends in bathroom and design. Its products are unique creations that stand the test of time, whilst the designs highlight an exciting new era made to enhance any bathroom space. Having recognised the new design renaissance in all thing's bathroom, Paco Jaanson strives to improve the functionality of the objects around them, delivering new shapes and functions to traditional bathroom apparel.
They believe bathrooms are very stimulating subject that has stopped simply serving one purpose, now its where you take care of both your body and soul. Paco Jaanson uses strong visual lines and a creative use of materials to generate unique chic bathroom attire. In fact, Paco Jaanson was instrumental in the design of the revolutionary bath filler, being the first to introduce it to the Australian market. Their motto is that one perfect fitting can transform the ordinary into a private sanctuary that creates a palace for physical and emotional wellbeing. Enjoy…

PARISI

Since the mid 90's, Parisi have been a major supplier of furniture, bathware and door ware objects in Australia and, in recent years, New Zealand, Thailand, Singapore, the People's Republic of China, Cambodia, Bhutan, the Maldives and Mauritius. Manufactured to the highest standards, PARISI provides superbly designed bathroom sanitaryware and bathroom furniture for domestic and commercial properties. PARISI also selects iconic pieces from our Italian partner brands to showcase design inspiration for our customers. Working closely with their partners such as Art Ceram, Flaminia, Fondovalle, Hidra, Newform, Simas, Stocco, Tecla amongst other global brands, enables PARISI to remain at the forefront of global design trends. PARISI's vision has always been to create and curate the ultimate range of interior products; a range offering a harmonious blend of design and quality.

Designing the best of Italian inspired products, the PARISI brand is tailored to creating beautiful bathroom pieces to complement the Australian lifestyle. PARISI's Italian supplier partners are world leaders in design, innovation, manufacturing, and sustainability. Made in state-of-the-art facilities, using components and materials sourced from the world's best suppliers, each object in their range combines advanced manufacturing technologies with traditional craftsmanship of professional artisans.

Rigorous design testing and quality controls ensure that PARISI products should function well more than their lengthy warranty periods.

Supplier INFORMATION

SIEMENS

2022marked 150 years of Siemens in Australia. After pioneering the pointer telegraph in 1847, Werner von Siemens dispatched his younger siblings to develop his patents internationally. Siemens Brothers & Co of London would go on to manufacture and install telegraph links across the British Empire, and by 1872 would become involved in an improbable project: an overland telegraph line stretching across the middle of Australia.

Television was brought into service just as the 1956 Summer Olympics would put Melbourne on the global stage. For locals who couldn't make it to the big events, black and white pictures were beamed directly into their sitting rooms for the first time—powered, of course, by Siemen's transmitters. It would be another decade before the initial range of valve-powered television receivers were superseded by transistor sets, with Siemens finally breaking through into the component supply market in 1968. That same year, engineers would complete a record-breaking coaxial route from Port Hedland to Perth via Carnarvon, a length of over 1900 kilometres! Carrying 1200 voice channels and a single television channel, it was this coaxial route that carried live footage of Neil Armstrong walking on the moon to viewers across Western Australia.

Positioned as pioneers in the television industry, Siemens would be selected for the initial order of colour television transmitters in 1973, with more and more Australians seeing pictures in colour for the first time throughout the rest of the decade. From the year 2000, the world started to enter a new era of change: an era where Siemens started to help the world address the megatrends of demographic change, climate change, urbanisation, and globalization.

In the first two decades of the 21st century, the transition to a more renewable energy future began to receive strong attention, as did the move towards intelligent infrastructure that is more automated and more digitalized. In 2014, the Snowtown II wind farm commenced generation as the first Australian onshore wind project for Siemens, today providing clean, emission-free power for 180,000 South Australian homes. Siemens' growing eMobility portfolio provides electric vehicle charging solutions to cities including Sydney, Brisbane, Auckland and Christchurch. Siemens has been and continues to be at the forefront of transforming what has become the everyday.

Supplier INFORMATION

smeg
technology with style

Over 70 years of passion and business vision. Smeg, founded in 1948 by Vittorio Bertazzoni in Guastalla, a town near Reggio Emilia, is the Italian company that has been able to evolve simple household appliances into authoritative interpreters of "Made in Italy". The Bertazzoni family's productive and entrepreneurial history begins way back in the 19th century. Starting out as blacksmiths, the Bertazzoni's, over time have branched out into other areas becoming cooker manufacturers and, later, manufacturers of machines for professional use such as washer-disinfectors and glassware washers. In 1955 the Production of cookers begins, reaching its peak with the presentation of the first Smeg brand cooker, Elisabeth. In 1956 the company presents Leda the first Smeg branded washing machine, thanks to the increase in production capacity to include laundry appliances. In 1979 Smeg sponsors the Ferrari Formula 1 team that runs with J. Villeneuve at that time. In 1985 instinctivley and incisively understanding new consumer requirements for more elegant products, the company begins working with architect Guido Canali to create ovens and hobs. In 1991 Smeg's collaboration with important designers continues, with the company offering ovens and hobs designed by architect Mario Bellini. In 1997 the FAB range of fridges is created, a product line destined to become an international style icon and status symbol. By 2008 Smeg celebrates its 60th anniversary and presents products designed alongside Australian designer Marc Newson, which leads to winning the wallpaper design award the following year. In 2019 the Vitality system and Smegconnect are introduced to the range and collaborate with Disney to create Micky Mouse special edition FAB. In the same year Smeg announces the acquisition of La Pavoni an historical company in the production of domestic and professional coffee machines. 2020 came along and Lavazza A Modo Mio Smeg embodies the unmistakable experience of Italian espresso, combined within an elegant and modern coffee machine aesthetic. The refined lines, designed in collaboration with deep design ensures the Lavazza A Modo Mio Smeg is a must have item. By then Smeg introduces its first cookware collection designed by the studio from Milan deep design by Raffaella Mangiarotti and Matteo Bazzicalupo and entirely made in Italy.
